

Additional Curriculum Areas Covered in Daily Wonder Guides

In some Provinces/States the government may require Home Learning families to report how they are covering curriculum. We have tried to make our guides so that you know for yourself that your children are receiving opportunities to understand concepts from grade appropriate core subjects: Math, Language Arts, Social Studies, and Science, as well as First Peoples Principles of Learning and opportunities to develop Social Emotional Competencies. The guides list the concepts covered in each lesson so that you feel confident in the connections between what your child will **understand over time** and what they are **doing** each day. This is because **our curriculum is concept based and competency driven**.

There are some additional curriculum areas covered in our guides that are not listed on the PDFs. We didn't want to overwhelm you with words. This document will describe some of those areas and characterize the activities that will cover concepts from those curriculum areas. ***If you are a home learning parent who needs to report curriculum, this guide can help you sort that out.***

Curriculum Area	Type of Activity that Provides Opportunity to Understand Concepts
Applied Design, Skills, and Technology (ADST)	Opportunities to use design thinking: designing, creating, making, evaluating products, services, and processes – making things For BC residents: look here for more info
Arts Education	Opportunities that support developing aesthetically through dance, drama, music and visual art via investigation of elements, creation of and response to art works, and interest in the arts – portfolio creation, Social Studies activities that involve immersion in a culture to understand it via the arts For BC residents: look here for more info
Career Education	Opportunities that help students develop the following: awareness of strengths, collaborative communication, experience in a range of roles, ability to learn and grow, adaptability, resiliency, and flexibility – activities that are collaborative like household chores BC residents: look here for more info
Physical and Health Education	Opportunities to understand aspects of physical, mental and social well-being as well as movement skills, respectful relationship skills, and personal and community health and safety decision making strategies – physical activities and skill building as well as discussions around how to be healthy including aspects of nutrition and mental health BC residents: look here for more info
